H-2A is presently the only legal solution to fill the growing need for Agriculture Labor where there is a lack of local workers available to fill the necessary positions for crops to be grown or fully harvested.

Fresh Harvest prides itself on being the best H-2A provider for the following reasons:

**Recruitment**
We specialize in the selection of experienced and crop specific workers, personally interviewing and recruiting before bringing the guest workers to the US.

**Onboarding**
Fresh Harvest handles all the transportation to Ports of Entry, trips to the US Consulate for Visas and ensures guest workers obtain all required documentation including social security numbers.

**Management**
We get our boots dirty! Fresh Harvest is different than most H-2A labor providers because we insist on taking an active role in the in-field/job site management of our employees.

- Housing, Meals and laundry; all the day-to-day necessities of each worker are met
- Employees are provided hands on training to meet specific harvest requirements of customers.
- We manage all required reporting to governmental agencies with official oversight of the H-2A Guest Worker program.
- All workers, whether domestic or guest, are offered voluntary, no cost transportation to the work site by Fresh Harvest.

**Employee Retention**
We assure that the same trained workers return yearly, often to the same client, by keeping in touch when they return to their home country.
